

IMPORTANT NOTICE:

The Strawberry Recreation District Board recently voted to approve the closure and removal of the men's and women's pool houses in order to address ongoing safety, accessibility, and repair issues and needs of the aging facility. The work to remove the 1960 pool houses will commence with the regular winter closing date of November 22, 2017.

SRD has developed a phased construction plan which will enable SRD to reopen the pool in early January 2018. Pass holders may use the main building facility bathrooms/showers and SRD will install outdoor showers in the pool area for rinsing. We will also provide a dry area in the pool area for pass holders to keep belongings while they are using the pool during the rainy season.

Funding strategies are being reviewed and future construction of a new community building is tentatively planned to begin in 2020 pending financing.

SRD Board of Directors and staff thank all pass holders, community members and community partners for their support as we work to address the safety and improve the facilities of the Strawberry Recreation District.

Thank you for your understanding while we address these needed safety and facility improvements.
